Salient Features

SHIFTEEZ®

Making Patient Transfer Safe & Easy

It is an invention in the field of patient transfer. An advanced technique (Patent Pending) to transfer patient without any discomfort and a smooth and safer way of shifting critical, unconscious, ICCU, ICU patients from stretcher to bed and bed-bed-stretcher.

The device consists of innovated transfer plate with strategically fixed wheels specially designed with proper weight distribution along with unique foldable mattress to maximum comfort while shifting patient. Also, height adjustable stretcher trolley is a part of unit to match the height of hospital bed.

Advantages

- No discomfort to patient while shifting from stretcher to bed or bed-bed.
- Suitable for critical, unconscious, bed bound ailing patients.
- Most easy and unique way of shifting.
- No lifting, tilting of patient.
- Even one person can shift patient.

Applications

- Large Hospitals
- Rural Hospitals
- Women's Hospitals
- Primary Health Centers
- Fracture Clinics
- ICCU / ICU's
- For patients in Comatose (Coma)

In the current situation of COVID-19, SHIFTEEZ® is a device of Patient Transfer where hospital staff will come in less contact with COVID -19 patients.

COST EFFECTIVE

Device requires no electricity, consumables hence no recurring cost.

CONVENIENT

Smart 3 side mattress folding that causes no discomfort to patient.

FAST

Transfer device with detachable mattress for easy transition with minimal effort.

SAFE

Special 4 corner locking belts to ensure transfer device is properly fixed on patient bed.

COMPACT

Weight of the device including mattress is 20 kg.

USER-FRIENDLY

Human friendly mattresses suitable for bed bound patients.

EFFICIENT

Roll-on wheels strategically fixed on the board for smooth functioning and proper weight distribution.

ECO-FRIENDLY

Anti bacterial; skin, fungus, scratch resistant; fire retardant; waterproof; suitable for ICU and OT.

LIFELINE Pharma

A Mumbai based organization serving to healthcare sectors for nearly two decades. We are focused to provide a solution for biomedical waste treatment and equipment for private and government hospitals. Our passion for science and our innovative edge has earned us customer satisfaction and a distinct place in the world of bio medical waste treatment management.

It is an ISO 9001: 2015 certified firm, was founded in the year 2000 by Mr. Prasad Nakhare and Mr. Kiran Khobare and under their leadership, we have created STERIWELL® (hybrid autoclaving biomedical waste treatment machine), STERINCI® (hybrid autoclaving biomedical and sanitary waste treatment machine) and SHIFTEEZ®.
